Summary

My favorite evaluation so far came from a woman at Canyon Ranch in Tucson after an hour and a half overview of my workshop. She had previously registered in six 5-day watercolor workshops nationally, flying to each with hotel reservations and car rental, only to stay a few days in each and leave in total frustration: **"You just changed my life! I can do this!!!!!"**

From students and former students I receive letters, notes, and emails exclaiming their delight. "My sketches bring back more memories than my photographs." "My friend had the sketch enlarged and taped above her bed in hospice to remind her how much her friends loved her." "I see the world as if cataracts were removed!"

All I can say is, I change lives. Nothing can be more rewarding.
